Or3L

Industrial IT Project Manager · Automation · Full-stack · AI

Near Limoges, France LinkedIn Portfolio : or3l-lab.github.io

PROFILE

Industrial IT professional with hands-on experience in full-stack software development and applied AI. I take a proactive, practical approach to understanding requirements, leading complex projects and improving business processes. My work combines Lean Six Sigma principles, quality standards shaped by aerospace experience and a strong focus on cybersecurity.

SKILLS

Projects & improvement
Complex projects, requirements analysis, audits, business process improvement, change management

Quality
Quality training, Airbus quality principles, aerospace quality control, rigour and adherence to procedures

Development & AI
Software design, full-stack development, business applications, AI engineering and AI agents

Application security, access management, security by design

Automation & systems
Industrial automation, motion control, monitoring, CMMS, MES, ERP

Microsoft & data
Microsoft 365, Power BI, data analysis

Continuous improvement
Lean, Six Sigma approach (DMAIC), PDCA, Kaizen, 5S, problem solving, standardisation

EXPERIENCE

Industrial IT Project Manager — 2025 – present
Sicame France — Arnac-Pompadour, France
Business applications, CMMS and machine monitoring; modernising tools and exploring practical applications of AI.

Industrial IT, then project lead (2019) — 2018 – 2025
SICAME Group — Arnac-Pompadour, France
Business applications, automation and industrial digitalisation projects.

Automation & process manager — 2015 – 2018
Cypack — Arcens, France
Special-purpose machinery for the food and pharmaceutical industries: automation, carry-handle application, product bundling and commissioning. Some machines handled one product every 200 ms.

Helicopter & avionics test technician — 2009 – 2014
Eurocopter / Airbus Helicopters — Marignane, France
Preparing and validating pre-flight tests, checking avionics and navigation systems, tracking results and following procedures.

Quality control — 2006 – 2009
Airbus — Toulouse-Blagnac, France
Quality control in an Airbus aerospace environment, applying quality principles and procedures in collaboration with production teams.

Electronics & IT repair technician — 2001 – 2006
Troubleshooting and repairing electronic and IT equipment.

EDUCATION

Quality and avionics systems training — One year — aerospace industry

1998 – 2001
French BTS diploma in Electronics — Two-year higher-education qualification — Lycée Alphonse-Benoît, L'Isle-sur-la-Sorgue

2010 – 2020
Self-directed learning — Industrial IT, MES and digitalisation
